

DEEP FREEZE

Eating down, beaten down  
Disease got me good  
The ruin spreading round  
It's stolen all it could

Calm and cool the wishes  
Justice serves last word  
My body has no hope  
To live a curse without a cure

The odds have turned against me  
In science I believe  
Cold crystal can protect me  
Asleep in a deep freeze

Written are the final days  
I pray will never come  
One flower blown away  
Another one will come

A story left behind  
My students can learn well  
The art of doing time  
Will stop this living hell

Dear Father, help me  
Give me strength to heal  
Give me one last hope  
God bless my final meal  
The thaw may be different  
A face never seen

Cold crystal can protect me  
Asleep in a deep freeze
